Subject: Please Support HB 4527 to strengthen regulation of oil and gas waste pits

February 14, 2025

Dear Members of the House Energy Resources Committee,

I am signing on in strong support of HB4572: Relating to the regulation by the Railroad Commission of Texas of certain pits used for the storage and disposal of oil and gas waste.

It is critical that we prioritize clean water and public safety while ensuring that landowners are fully informed and give their consent before waste pits are buried on their property. These waste pits, if inadequately overseen by the Railroad Commission of Texas, pose significant risks to our environment — particularly our precious water resources, which are essential for the health and well-being of our communities.

The potential for contamination of groundwater and surface water from poorly maintained or improperly lined waste pits is a serious concern. Produced water and sludge containing oil carcinogens, salt, and radionuclides are byproducts of oil and gas extraction and can degrade water quality, threaten essential water supplies, and lead to severe health problems for humans, animals, and agriculture. HB 4572 will help prevent environmental hazards by establishing new groundwater protections, requiring operators to bond the cost for waste pit closures upfront, and strengthening siting and construction standards.

Furthermore, landowners must be thoroughly informed, and their consent obtained before any waste pits are established. Transparent communication and respect for property rights are crucial in creating trust and cooperation between industry stakeholders and Texas communities, especially those already unfairly burdened by pollution.

The updates to waste pit rules in House Bill 4572 reflect a more responsible approach to handling oil and gas waste that will better safeguard our public health and ensure that our water remains clean and safe for future generations.

Sincerely,

Virginia Palacios
Executive Director, Commission Shift Action
